Please find below and/or attached an Office communication concerning this application or proceeding.

# Office Action Summary

Application No.

10/728,564

Applicant(s)

HUSETH ET AL.

Examiner

Brian A. Zimmerman

Art Unit

2612

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-24 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 1 recites the limitation "keybob" in the last line of the claim. There is insufficient antecedent basis for this limitation in the claim. It is assumed this is merely a typo, and the interpretation given for consideration of art is a "keyfob."

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

e) the invention was described in — (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language;

1. Claims 1,2,7,13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Berardi (2003/0167207).

Berardi shows a method for providing access to a financial transaction, where the system includes two versions of the transponder 102. The first embodiment of transponder 102 does not include a fingerprint reader (figure 2); this is interpreted as a badge. The second embodiment of transponder 102

Art Unit: 2612

includes a fingerprint reader (figure 9), this is interpreted as a keyfob. The figure 9 transponder sends the fob ID (stored in memory 214) with the fingerprint so both can be authenticated. When the data is read from the transponder, a comparison is made to authorize financial access; this meets the limitation of determining if the received code is authentic and providing access upon authentication. If the data is from a badge, the authorization step compares account data (or the transponder ID), paragraph 59. If the data is from a keyfob the authorization step compares fingerprint data, paragraph 141. It is the examiner's position that in order to compare the received data from the figure 9 transponder with stored fingerprint data, a decision inherently is made that the data received includes fingerprint data. This meets the limitation of determining if the code is from a badge or keyfob.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4,5,8,10,11,15,16,18,20,22,23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berardi (2003/0167207) as applied to claims 1 and 2 above, and further in view of Fuku (6868170).

Art Unit: 2612

Berardi shows a method for providing access where the system includes two versions of the transponder 102. Berardi shows fingerprint data being compared, but does not exactly teach a specific method or apparatus to perform such function.

In an analogous art, Fuku shows a security system that extracts fingerprint data from a sensor 11 and converts the fingerprint data into digital data 12 that can be compared to data in a storage unit 13 for access authorization. This converting and comparing allows for easy processing of the fingerprint authentication process. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have used the fingerprint authorization process (and elements) in the Berardi system since it would provide processing of the desired fingerprint authorization of Berardi.

3. Claims 3,6,9,12,17,19,21,24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berardi and Fuku as applied to the claims above, and further in view of Fitzgibbon (2003/0210131).

In an analogous art Fitzgibbon teaches an access security system where a transmitter can send codes to a garage door for access authorization. The portable transmitter can additionally include a fingerprint reader to send information regarding the user's fingerprint, also for authorization. Fitzgibbon is cited for teaching that in this type of system, the use of rolling codes can improve the security of the system. See figure 5.

Art Unit: 2612

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have used rolling codes in the above modified system since rolling codes can increase the security of an access system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian A. Zimmerman whose telephone number is 571-272-3059. The examiner can normally be reached on 7 am to 4 pm E.S.T.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wendy Garber can be reached on 571-272-7308. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
